THE BATTING AND FIELDING RECORDS

There are only five players who
have competed in six or more games
in the Oahu Baseball League who
still have errorless records, the small
coterie losing Ah Tin and Hamanuku
by reason of an error each by these
two players on Sunday last. Ah Tin
dropped to fourteenth place and Ha-
manuku to seventh, Ah Toon and
Walker have also dropped slightly,
while Rice has moved up the table
a trifle, but otherwise there is little
change from last week. The table to
date is as follows:

The Batting Averages.

By process of elimination, Soares
drops out of the calculations for the
batting averages, only those who have
taken part in six or more of the eight
games played being taken into consid-
eration. Sumner increased his per-
centage by his hitting on Sunday last
and is now ahead with a percentage of
.333, with Barney Joy and First Base-
man Akama second with .290, each of
the three mentioned having nine base
hits. The figures are as follows:

| | G. | P. | A. | E. | Pct. |
|---------------|----|----|----|----|------|
| Sumner, B.M. | 7 | 27 | 9 | — | .333 |
| Joy, B. | 8 | 31 | 9 | 1 | .290 |

"3 C" Dry Whole Milk is made by
removing only the water from pure
unskimmed milk. No foreign sub-
stance whatever is added. Therefore
when we restore the water to "3 C"
Dry Whole Milk we have all the con-
stituents of pure fresh milk.

This product is not a substitute for
milk. It is milk. It is not to be con-
fused with so-called "Malted Milks" or
other patent foods which are prepared
principally from cereals.

The burnt taste and color notice-
able in condensed milks are not
found in this product. For equal food
value it has less than one-fourth the
weight of commercial condensed
milks. It keeps in any climate and
is not affected by freezing.

"3 C"

Dry Whole Milk

Is packed in: 1 lb., 1 lb., 5 lb., and
45 lb. Metal Cans with Friction
Covers.

Will revolutionize the whole canned
milk trade.

FITZGERALD TOO SPEEDY FOR SOLDIER KING

The publication of some of the per-
formances of Jimmie Fitzgerald, who
arrived yesterday by the Makura,
forcibly demonstrates how superior
he is to the class of runners seen
here during the past six months. How
greatly King will have to improve
to have an even break with Fitzger-
ald may be gauged from the fact that
Fitzgerald averaged 5:13 1-3 for three
miles, 5:29 1-5 for five miles and 5:14
for a second race of five miles re-
cently, in addition to running one
mile in 4:52.

Over the full Marathon course,
Kaoo might have a chance against
Fitzgerald, but that is very doubtful,
and it will be surprising if Fitzger-
ald does not take all the island cham-
pionships if he remains here for

more than a fortnight. With Con
Hubbette a probable runner against
Fitzgerald, it may be that there will
be some good racing, but nothing
definite as to Hubbette is known.
Fitzgerald will make a stay of per-
haps two months in Honolulu before
proceeding to New York, but the
length of his stay here depends solely
on the amount of racing he is able
to do.

Alca Shut Out Waianae.

Alca appears to be a certainty for
the Sugar League pennant, having
now ten wins to one loss, beating
Waianae last Sunday 6-0. Waianae is
second with six wins to five losses,
while nothing is to be feared from
Ewa or Waipahu. Only seven match-
es remain for Alca to play to com-
plete the season.

one cliff to the other of the gorge,
with a deep chasm beneath it. The
floor of this wonderful bridge is made
of plate glass one and one-half inches
in thickness set in steel framework.

In Lyons, France, pavements made
of glass have been in use for some
time. They are constructed of cer-
mo-crystal, ceramic stone, or de-
voted glass, and are laid in the form
of blocks eight inches square, each
block containing sixteen parts in the
shape of checkers. It is said that
these blocks are so closely fitted to-
gether that water cannot pass be-
tween them. The whole pavement
presents the odd effect of a huge
checker board. The special advan-
tages claimed for this style of pave-
ment are that it has greater resis-
tance than stone; that it is a poor
conductor of cold—ice, accordingly,
not forming readily upon it, and,
finally, that it is more durable than
stone and much cheaper, besides af-
fording no places for the lodgment
of microbes.

In Germany they manufacture glass
telegraph poles near Frankfurt. The
glass mass whereof these poles are
made is strengthened by interlacing
and intertwining with strong wire
threads. It is asserted that the glass
poles show their superiority over
wooden ones by reason of their re-
sistance to the ravages of insects in
tropical countries, and against the
climatic influence of rain, snow and
sleet in other countries.

The ingenious Germans have also
devised glass water pipes, having a
covering of asphalt to prevent frac-
ture. These are employed in many
parts of the empire, and it is claimed
that they afford thorough protection
against moisture in the ground,
against the action of acids and alkalis,
and also that they cannot be pen-
etrated by gases.

Glass cloth for dresses is no new
thing, having been placed on the
market a number of years ago. This
glass cloth has the same shimmer
and brilliancy of color as that shown
by silk. Besides glass cloth, there
may be instanced manufactured glass

curtains, carpets, table cloths and
napkins, most of which are results of
the ingenuity of European manu-
facturers.—Titillita.

phy entertainers are always character-
ized by a spirit of camaraderie sel-
dom found in the more formal func-
tions, and the ladies who gathered
yesterday, being intimate friends of
the hostess and her complimented
guest of honor, carried along their
dainty needlework and spent the
afternoon in friendly converse and pleas-
anties.

At five o'clock delicious light con-
ventional refreshments of coffee, sand-
wiches, layer cake, pineapple and
orange punch, sherbet and bon bones
were served, and many good wishes
were extended to Mrs. Lyeurgus for a
pleasant and enjoyable holiday on her
pending journey.

Those who were bidden to partake
of this charming hostess' hospitality
were, besides Mrs. George Lyeurgus,
Mrs. George Kluegel, Mrs. George An-

Mrs. George Ross.

A very pretty wedding will be so-
lemnized this evening, when Miss Car-
olyn Sheffield will be united in mar-
riage to Mr. Kenneth Barnes. The ser-
vice, which will be strictly private,
will be performed at the home of Mr.
and Mrs. Frank C. Atherton in College
Hills, Mrs. Atherton being a cousin
of the bride. The Rev. Charles Sim-
pson, the bride's uncle, will read the
service, after which at eight-thirty
o'clock, a reception will be held, a
number of friends of the young couple

and Mr. and Mrs. Atherton having
been invited.

Miss Sheffield is very well known
and popular in Honolulu, and has
scores of friends.

Originally she came from her home
in China, but for some time has been
a teacher of music at Punahou Col-
lege.
